Factory sampling pack

Owner: Shane Cooper | Written design brief takes precedence over campaign renders

What the factory is being asked to make

Style ID	Product	Status
PS-H01 + PS-J01	Signature oversized hoodie + tapered joggers	Design locked; physical fit and materials not approved
PS-M01	Integrated modular hood mask for PS-H01	Prototype required; no safety or visibility certification claimed
PS-L01 + PS-B01	High-waist leggings + racerback longline bra	Black / charcoal sampling direction
PS-Z01 + PS-J02	Hooded full-zip alternative + matching joggers	Option; do not combine with signature back print
PS-T01 / PS-T02	Half-brain / electric-brain graphic tee backs	Separate graphic capsule; original print masters required

Release boundary: This pack is ready for a factory quotation and first prototype discussion. It is not a graded pattern, print separation or approved bulk-production specification. Do not manufacture from a photorealistic image alone.

Priority: written style/placement instructions > owner-approved artwork and sample > campaign image. Report contradictions before cutting. All left/right references mean the wearer's left/right.

01 / Signature set

PS-H01 hoodie + PS-J01 joggers | Core: black; approved colourway development: charcoal / sand

Component	Sampling specification / factory action
Main cloth - route A	420-450 gsm soft cotton French terry. Quote actual composition, weight tolerance, shrinkage and finishing. Do not claim organic without evidence.
Main cloth - route B	320-360 gsm four-way stretch double-knit with brushed inner. Quote separately; do not substitute route B without owner approval.
Hoodie construction	Oversized boxy drop shoulder; double-layer hood; kangaroo pocket with bar-tacks; nominal 63.5 mm (2.5 in) finished cuff/hem rib. Metal-tip cords, no decorative side stripes.
Jogger construction	Matching cloth; relaxed seat/upper thigh, tapered leg, rib ankle; waistband elastic and internal cord. Match dye lot. Pocket construction to confirm on prototype.
Prints / trim	Restrained reflective silver transfer or matte silver silicone; name product, supplier and process. Branded 3M/YKK only if genuine and documented. No assumed protective visibility rating.

Factory to propose: main/rib composition, elastane content, seam type and allowance per panel, stitch density, elastic width, hood/mask pattern and pocket reinforcement. Submit swatches with sample. Do not invent finished measurements from the model image.

02 / Placement map

One P.S. per jogger, LEFT THIGH ONLY | All mm sizes below are sampling targets

Style / zone	Mark + target size	Placement instruction
PS-H01 left chest	P.S.; proposed 35 mm high	Wearer left chest. Factory proposes offsets from centre front and high-point shoulder (HPS); approve on sample.
PS-H01 centre back	Exact Crying Brain; 220-240 mm wide	Centre on back; factory proposes top offset from back neckline, clear of hood. P.S. below brain as locked signature artwork.
PS-J01 / J02 left thigh	P.S.; 22 mm high	One mark only. Factory proposes distance below waistband and from side seam; right thigh/calf and rear blank.
PS-M01 lower face	Grillz/drips + tiny side P.S.	Flexible flat print, not gems, metal, teeth or loose components. Final print area from fitted mask pattern; no brain on mask.
PS-L01 left upper thigh	P.S.; 22 mm high	Factory proposes waistband/side seam offsets; no front waistband wordmark.
PS-L01 rear waistband	PLEADING SANITY; 6 mm text height	Centre below top waistband seam. No additional lettering.
PS-B01 left chest	P.S.; 14 mm high	Tiny mark on wearer left chest; underbust band blank.
PS-B01 upper back	Crying Brain; 18 mm high	Centre on racerback, clear of seams. Use exact approved mark.
PS-Z01 left chest / hem	P.S.; proposed 25 mm high / wordmark 8 mm text height	P.S. at left chest; PLEADING SANITY centred on front rib hem. Back blank.

Artwork handoff - required before print setup

Owner supplies approved SVG / AI / print-ready PDF for P.S., Crying Brain, wordmark and grillz, plus original tee print masters. Preserve proportions; never trace a generated mockup or replace the font. Factory supplies 1:1 print placement proof, print dimensions, silver swatch, transfer thickness and stretch/wash settings for approval.

Not approved yet: HPS/centre-front offsets, final back-logo size per size, grading of placement, ink system, print temperature/pressure/dwell and colour standards. Confirm on the signed pre-production sample.

03 / Modular hood mask

PS-M01 | Garment accessory prototype; no PPE or clear-vision claim

Construction sequence - read in this order

1. Permanent lower panel. Sew soft four-way stretch lower-face panel into the inside front hood opening along the chin-to-ear attachment line. This is integrated into the hoodie, not a separate loose balaclava. Factory to pattern attachment and seam stretch so it does not pull the hood or press against the nose.

2. Removable upper eye mesh. Bind fine breathable mesh with soft stretch tape. Proposed four low-profile, fabric-encapsulated magnetic snap points: two at lower panel and two inside hood. Confirm location, polarity and retention on prototype; no exposed magnets or rigid contact edges.

3. Hidden stow channel. Make a discreet lined tunnel inside the hood. Lower panel folds/rolls away while remaining attached; upper mesh detaches and stows with it. Secure stored mesh inside channel. Both panels must leave eyes, nose, mouth and chin fully clear. Channel dimensions come from the rolled physical sample, not a zero-bulk assumption.

4. Flexible graphic. Dripping silver diamond grillz printed on the stretch lower panel; tiny P.S. on the side. Do not attach metal, gems or actual drip pieces. No Crying Brain on mask.

Sample acceptance: comfortable breathing/speaking, condensation, skin contact, mesh visibility, snagging, wash retention, magnet encapsulation and stow comfort must be assessed before release. Do not promise crystal vision or zero bulk. Full-face mode is not specified for training, driving or machinery. Manufacturer must assess accessory suitability and hardware risks before sale.

04 / Performance set

PS-L01 leggings + PS-B01 longline racerback bra | Black and charcoal

Element	Sampling instruction
Fabric	260-280 gsm matte nylon / elastane interlock. Proposed 75/25 composition to sample, not a certified result. Four-way stretch and soft hand; match bra/leggings dye lot.
Leggings	High waist; proposed 120 mm finished double-layer waistband; diamond gusset; subtle curved rear contour seams; flat structural seams. No stripes or front waistband text.
Sports bra	Modest scoop neck, racerback, supportive longline cut; lined front, optional removable cups pending fit sample. Plain underbust band.
Branding	Leggings: P.S. left hip only, small rear waistband wordmark. Bra: tiny left-chest P.S., tiny upper-back Crying Brain. Sizes on placement page.
Performance checks	Assess opacity under stretch in bright light, waistband roll, seam chafe, recovery and sweat/wash colourfastness on physical samples across sizes. Support/impact rating is not established.

No unsupported marketing claims: "squat-proof", "medium impact", compression rating and long-term durability need physical sample evidence. Images illustrate the intended fit; they do not establish performance or size accuracy.

05 / Other collection options

Keep these style variants separate; do not mix their branding instructions

PS-Z01 full zip + PS-J02: use supplied hooded, raglan full-zip silhouette; propose 360 gsm performance double-knit, concealed reverse-coil zip and split front pockets. P.S. left chest, centred hem wordmark, plain back. Joggers one left-thigh P.S. only. Earlier funnel-neck / chest-brain / calf-logo draft is superseded for this option. No mask added to this style without a new prototype instruction.

PS-T01 / PS-T02 tees: oversized drop-shoulder black tee, proposed 280 gsm cotton jersey and substantial neck rib. Left image = silver half-brain back; right = original cyan electric-brain back. These are the supplied graphic capsule exception to the core muted palette. Front design is not supplied: quote blank front pending owner approval. Proposed back print width 280-300 mm to approve on sample. Quote screen print vs DTG, hand-feel and setup separately; retain original wording/artwork.

Other references: PS-Q01 quarter-zip is a separate funnel-neck sampling option with left-chest P.S., front hem wordmark and plain back; pair with J02. It is not the default full zip. The earlier clean-front core hoodie is a separate historical variant (PS-H02); do not erase the signature H01 left-chest P.S. or silently put its back print on Z01.

06 / Measurements to confirm

Factory completes finished-garment spec in cm before first size set; owner signs off fit

Proposed base sizes: men/unisex M; women M. Size range, body chart, fit model and intended ease remain to be agreed. No numeric body/finished dimensions are invented from campaign models. The factory supplies a marked point-of-measure diagram and all values below.

Style	Point of measure (POM)	Base / tolerance / grade
H01 / Z01	Half chest 2.5 cm below armhole; body length HPS to hem; shoulder width; sleeve length by chosen construction; bicep; cuff opening; hem opening; hood depth/height	Factory: ____ / ____ / ____
J01 / J02	Waist relaxed and stretched; hip at defined distance below waist; front/back rise; thigh at defined crotch offset; knee at defined inseam offset; inseam/outseam; leg opening; cuff height	Factory: ____ / ____ / ____
L01	Waist relaxed/stretched; waistband height; hip; front/back rise; thigh; knee; inseam/outseam; hem; gusset length/width	Factory: ____ / ____ / ____
B01	Half bust; underbust relaxed/stretched; body length HPS; neck depth; armhole curve; strap width; racerback width; band height	Factory: ____ / ____ / ____
M01	Lower panel flat width/height and stretch; eye mesh width/height; attachment curve; snap offsets; channel length/width; stored panel thickness	Factory: ____ / ____ / ____
T01 / T02	Half chest; HPS body length; shoulder width; sleeve length; sleeve opening; neck width/depth; rib height	Factory: ____ / ____ / ____

Factory must return: measurement table for every size, measurement method, tolerances by POM, grading increments, seam allowances, shrinkage compensation, finished garment weight and updated pattern revision. Owner reviews a washed sample and confirms fit; do not treat model proportions as a size chart.

Colour: physical lab dips for black, charcoal and sand; women black/charcoal. Deep olive is reserved, not instructed for this run. Screen colours and generated silver highlights are not dye/ink standards.

07 / Sampling & quotation

No purchase order, payment commitment or bulk approval is issued by this pack

The approval sequence

1. Return itemised quote and questions; confirm style IDs, construction and artwork availability.
2. Submit fabric/rib/elastic swatches, lab dips, reflective print strike-offs and named hardware options.
3. Make first fit prototype in base size; return annotated measurements and mask construction photographs.
4. Owner reviews fit, branding, mask modes and wash checks; record revisions in writing.
5. Produce revised fit sample, then full size set and pre-production sample with final labels/packaging.
6. Obtain Shane Cooper's written sample sign-off and separate purchase order before any bulk cutting or production.

Factory quote - break out every cost

Requested field	Factory response
Factory / contact / location	_____
Style, quantity, size split and MOQ per colour	_____
Sample, pattern and revision fees	_____
Main fabric, rib, trims and print setup / per unit	_____
Mask module / magnetic hardware surcharge	_____
Unit price and named Incoterm / currency	_____
Packaging, freight, duties / taxes and exclusions	_____
Prototype / size set / bulk lead time	_____
Wash / opacity / print / hardware checks + evidence	_____
Payment terms / quote validity	_____

Founder price targets, not supplier quotes: hoodie GBP 8-12, joggers GBP 7-10, leggings GBP 5-7 FOB. These may exclude mask, print, small-order costs and shipping. Factory must confirm achievable specification and price; no target is guaranteed.
